## SUMMARY

Product & UX Designer with experience owning complex fintech and enterprise workflows end-to-end. Strong at breaking down system-heavy problems, driving cross-functional alignment, and making high-impact tradeoffs that improve speed, adoption, and decision-making.

## PROFESSIONAL EXPERIENCE

**Product Designer | KredX** *September 2025 – Present*

- Owned end-to-end redesign of factoring unit creation (0→1 digitization), reducing time on task by 50%
- Designed bulk bidding workflows, enabling faster deal evaluation and improving participation in high-volume scenarios for financiers
- Simplified invoice upload (error handling + feedback), reducing error rates by ~40% and improving time-on-task
- Shipped multi-account access, reducing login friction and drop-offs in team-based workflows
- Launched multi-channel NPS system with 43%+ participation to benchmark UX and drive product prioritization
- Improved payment success rates for enterprise clients (e.g., Canon) by fixing transaction flow failures
- Designed, built and launched an internal application form builder, enabling dynamic pre-filling and client customization, reducing manual data entry errors

**Product Design Intern | STAGE** *November 2024 – May 2025*

- Identified drop-offs in content discovery and introduced trailer playback within browsing, improving content evaluation and driving +13% engagement
- Designed “My List” as a retention mechanism, enabling users to defer consumption decisions and contributing to reduced churn among returning users
- Owned end-to-end design of in-product feedback system, achieving 37% adoption and improving signal collection from passive users

**Product Design Intern | nurture.farm** *June 2024 – Oct 2024 & Apr 2022 – Jun 2022*

- Conducted 15+ field interviews and workflow audits to uncover operational gaps, shaping requirements for ML-driven solutions
- Designed partner task management system, improving clarity in distributed workflows and increasing efficiency by 8%
- Synthesized insights from field research (10+ users) into actionable product decisions, bridging on-ground realities with roadmap priorities

## SKILLS

**UX & UI Design:** Wireframing, Prototyping, Design Systems, Information Architecture, Motion Design

**Research:** User Interviews, Usability Testing, Data Analysis, Competitive Audit, A/B Testing

**Product Thinking:** Product Strategy, Design Thinking, Requirement Gathering, Stakeholder Collaboration

**Design & Tools:** Figma & FigJam, Adobe Suite, Rive, Amplitude, Jira, Notion, Stitch, Claude Code, Make

## EDUCATION

**Bachelor of Design** *2021 – 2025*

Delhi Technological University

## CERTIFICATES

- ML for Product Managers — Duke University
- AI Engineering Professional — IBM
